

KORNICHE TAPPING FLUID

A hand applied cutting oil for drilling, boring, tapping and reaming

Description

Korniche Tapping Fluid is a hand applied cutting oil, specially formulated using a synergistic blend of extreme pressure additives, lubricity agents and corrosion inhibitors.

Applications

Tapping Fluid has been designed for use in difficult machining operations on difficult to machine metals. These include reaming, boring, tapping and drilling on stainless and other high alloy steels.

Summary of Benefits

- EXTENDS TOOL LIFE
- REDUCES TOOL CHANGES
- PENETRATES RIGHT TO THE CUTTING EDGE
- PROMOTES SURFACE FINISH
- REDUCES SCRAP
- INCREASES FEED RATES
- FREE FROM SOLVENTS
- CONVENIENT TO USE
- SAVES MONEY

Directions For Use

Tapping Fluid can be applied directly to the cutting tool or workpiece from its easy-to-use squeeze bottle.

Product Data (Typical)

Appearance	-	Clear brown liquid
Odour	-	Pine
Extreme pressure system	-	Sulphur and chlorine
Lubricity agents	-	Synthetics esters
Flammability	-	Nonflammable

Precautions

Not to be taken internally
Keep out of reach of children
Keep away from direct heat
Do not store in direct sunlight or heat

Health and Safety

Further Technical Data and Health & Safety Information is available from the Customer Service Department, Oxtol Chemical Limited.
